Gravity CMH20 car phone holder

Marketing information	
Product name	Gravity CMH20 car phone holder, black
Package Product name	Gravity CMH20 car phone holder
Headline	**Hold on tight**
Product keywords	One-hand operation. Gravity. Firm grip
Main characteristics	Compatible with all 4.7 - 6.7 inches smartphones Place and remove your phone in a few seconds using only one hand Working on gravity principle, the holder assures automatic locking and a stable grip even on bumpy roads Easy access to the charging port of the smartphone for any cable
Product description	Designed to work on the gravity principle, this car phone holder locks your device in place as soon as you slide it in. No buttons to push, or metal plates stuck to the back of your phone. Simply slide your phone into the gripping arms of the holder and let the weight of your phone pull it down and lock it into place. Thanks to the gravity design, the CMH20 car phone holder makes it easy for you to place and remove your phone in just a few seconds whenever you need it, using only one hand. But that doesn't mean that a little bump on the road can represent a threat to your phone. On the contrary, the CMH20 has a firm grip that will securely hold your phone in place even on bumpy roads. It is compatible with all 4.7 - 6.7 inches smartphones and can be easily mounted in most car air vents. Moreover, you can use the included 3M adhesive to fix it on the dashboard. Need to recharge your phone while driving? No worries! The CMH20 is specially designed to offer easy access to the charging port of your smartphone for any cable. The holder is adjustable, offering the option to rotate it 360° in order to get the best viewing angle.
