# Dash Patrol DC2 Dashboard Camera, 1080p Full HD
TLL711002

# Dash Patrol DC2
## Road safety
## GPS. G-sensor. Parking monitor.

## Characteristics:

- Full HD resolution for clear images
- Built-in GPS module adds your speed to every video
- G-sensor detects impact and starts recording
- Parking monitor function - records when motion or impact are detected

The Dash Patrol DC2 captures video in 1920 x 1080p at 30fps, while its 140° wide angle lens captures everything in front of your car, reducing blind zones.

When the built-in G-sensor detects impact, the camera starts recording and locks the file on your microSD card, preventing it from being overwritten by newer videos.

In parking monitor mode, with the car's engine turned off, the camera starts recording when it detects movement or an impact.

The GPS module adds information about your speed and location to every recording.
