SMART HOME

Give your home a smart upgrade!

Technology comes into your future through your front door.

With Tellur's Smart Home range you can control your house from everywhere with smart, fully customizable products, with integrated features for a better living.

WIFI RGB SMART BULB
code: TLL331011

WIFI WHITE SMART BULB
code: TLL331001

WIFI SMART SWITCH
code: TLL331051

You can adjust the intensity and color of the light for each room individually, you can increase or decrease light strength depending on your activity or based on the scenarios you saved in your Tellur Smart app.

At night, when you are all tucked in and ready to sleep, the light turns off automatically at the exact time you scheduled it from your Tellur Smart app. Also, you will never have to worry about forgetting your lights on, because you have access to all your bulbs from everywhere.

A bit forgetful? No worries! You will never have to turn back home if you forget to unplug your iron because you can control each socket individually, without having to turn off all the devices in your smart power strip.

TELLUR
SMART

APP

The use of Tellur's Smart Home products does not require a master hub or a subscription. You only need Tellur Smart App which allows you to control your gadgets from everywhere, being able to register up to 150 devices at the same time.

The configuration process can be done in three (3) easy steps:

- Make sure you have a Wi-Fi internet connection;
- Install Tellur Smart app and create an account;
- Add your devices by scanning the QR code on the product or by selecting the devices from the app.

Tellur Smart app is available in Google Play and AppStore and lets you create your own scenario to suit your needs, based on details such as temperature, humidity level or the time of the day.
